

A practical introduction to MiFID II for asset managers: What you need to know now

MiFID II/MiFIR is a broad expansion of MiFID with consequences for all asset managers, not just European MiFID firms. Join this webinar for a discussion on what asset managers need to know at this time.

Topics will include:

- New transaction and trade reporting requirements
- Restrictions on research and other inducements
- Algorithmic trading (including high frequency trading) and direct electronic access (including DMA)
- Conduct of business rules (including best execution and remuneration)
- Commodity position limits, management controls and reporting
- Corporate and product governance
- Third country access
- Effects on AIFMs, UCITS ManCos and investment managers generally
